iP-CB Intelligent Circuit Breaker How To Set CV63 Factory Reset

Please see the data sheet on **iP-CB Intelligent Circuit Breaker**
How To Change Any CV Setting before attempting to change any CVs.

CV63

This CV resets the iP-CB back to it's factory settings

For example:

Set **CV63 = 36** the iP-CB will be factory reset, hence:

CV57 = 0

CV64 = 0

CV66 = 0

The iP-CB's address will be reset to **200**

Please think carefully before changing any CVs on the iP-CB
