Setting The Switch Numbers On The Alpha Central Integrated 12 Way Digital Switch

From the box your Alpha Central 12 way Digital Switch is set with switch numbers 1 to 12, reading from left to right. If you need to change this, please follow these instructions

Step 1

Hold down the **ACC** button as you switch the unit on from the small **OFF - ON** switch on the left hand side of the unit. The red digits will start to flash.

Step 2

Push the **CAB** button to select which digit you want to change, and then push the **ACC** button to move the digits up. If you go too far, don't worry as it scrolls round from 9 to 0 again.

Step 3

Once you have selected the correct CAB address, hold down the **CAB** button until the screen shows **YES**.

Note - if you have multiple Alpha Centrals connected together, they will automatically be updated with the new addresses i.e. if the first central is set at 10 to 21, the second central will be set at 22 to 33.
